

Statement of the Problem

This study focuses on the **“Integrated Scholarship Enrollment and Competency-Based E-Access Management System for Auto Mechanic Training Centre of TESDA Region VIII.”**

Specifically, this seeks to answer the following questions:

1. What are the problems encountered by respondents in the current Integrated Scholarship Enrollment and Competency-Based E-Access Management System for Auto Mechanic Training Centre of TESDA Region VIII?
2. What features and system design may be proposed to address the identified problems in the enrollment, scholarship qualification assessment, and modular e-learning processes?
3. What functional and technical requirements are necessary in developing Integrated Scholarship Enrollment and Competency-Based E-Access Management System for Auto Mechanic Training Centre of TESDA Region VIII?
4. How do respondents assess the developed system in terms of :
 - 4.1 Functionality
 - 4.2 Usability
 - 4.3 Reliability
 - 4.4 Security
 - 4.5 Performance

Part I: Respondent Profile

1. Role:

☐ Applicant / Aspiring Scholar

☐ Currently Enrolled Trainee

☐ Instructor / Trainer

☐ Administrative Staff

☐ Others: _____

2. NC Level / Program: _____

3. **Digital Literacy / Technical Familiarity:** How would you rate your level of comfort in using web-based platforms for learning or administrative applications?

☐ **Beginner** (I rarely use online systems and need assistance)

☐ **Intermediate** (I am comfortable navigating websites and uploading files)

☐ **Advanced** (I am very proficient in using various online management systems)

4. What is your primary method of accessing the internet for school or application-related tasks?

☐ **Mobile Data** (using a smartphone)

☐ **Home Wi-Fi/Broadband**

☐ **Internet Cafe / Public Center / Computer Lab**

☐ **No regular access**

Part II: System Evaluation

a. Directions: Please rate your experience with the current manual enrollment and scholarship vetting process.

Scale	Description
4	Strongly Agree
3	Agree
2	Disagree
1	Strongly Disagree

	Statements	4	3	2	1
1.	Submitting documentary requirements (academic records, indigency certificates) is time-consuming.	☐	☐	☐	☐
2.	There is no centralized portal to track the status of scholarship applications in real-time.	☐	☐	☐	☐
3.	The manual vetting of applicants against TESDA Omnibus Guidelines is prone to human error.	☐	☐	☐	☐
4.	Information regarding scholarship qualification criteria is not easily accessible to remote applicants.	☐	☐	☐	☐
5.	Paper-based Competency-Based Learning Materials (CBLM) are easily damaged or lost.	☐	☐	☐	☐
6.	It is difficult for trainers to monitor the individual mastery of scholar across multiple NC levels simultaneously.	☐	☐	☐	☐
7.	Scholars experience delays in moving to the next module due to slow manual recording of "Competent" status.	☐	☐	☐	☐
8.	Communication between administrators and applicants regarding missing documents is inefficient.	☐	☐	☐	☐
9.	I encounter technical problems when using the system.	☐	☐	☐	☐
10.	The current system lacks an automated way to generate required TESDA learner profile reports.	☐	☐	☐	☐

1. What is the most significant bottleneck you face during the enrollment/recruitment period?

2. Have you ever experienced delays in your training progress due to record-keeping issues?

Part III – Proposed System Features

Please indicate how important the following features are for the proposed system.

Scale:

1 – Not Important

2 – Slightly Important

3 – Moderately Important

4 – Important

5 – Very Important

No	Proposed Feature	1	2	3	4	5
1	Automated Vetting Algorithm: Auto-screens applicants based on socio-economic and academic data.	☐	☐	☐	☐	☐
2	Digital CBLM Repository: Online access to Automotive Servicing NC I to IV modules.	☐	☐	☐	☐	☐
3	Real-time Achievement Chart: Visual dashboard for tracking student competency mastery.	☐	☐	☐	☐	☐

4	Document Upload Portal: Secure digital submission of PDF/Image requirements/National Certificates and other credentials.	☐	☐	☐	☐	☐
5	Automated Notifications: SMS or email alerts for qualification status and module updates.	☐	☐	☐	☐	☐
6	Interactive Modular Quizzes: Self-paced assessments that unlock subsequent learning units.	☐	☐	☐	☐	☐
7	Admin Analytics: Data-driven reports on scholarship distribution and graduation/employment rates	☐	☐	☐	☐	☐

Part IV System Design Considerations

Rate the importance of the following system design aspects.

No	System Design Aspect	5	4	3	2	1
1	User Interface (UI) Simplicity: Easy navigation for users with varying levels of digital literacy.	☐	☐	☐	☐	☐
2	Data Integrity: Ensuring scholarship scores in assessment from NC I – NC IV and scholar grades remain accurate and unalterable.	☐	☐	☐	☐	☐
	Mobile Responsiveness: Accessing modules/portals via smartphones for scholars without laptops.	☐	☐	☐	☐	☐

3		☐	☐	☐	☐	☐
4	Modularity: The ability to add new training regulations (TR) as TESDA updates standards.	☐	☐	☐	☐	☐
5	System Integration: Seamless connection between enrollment data and the learning management side.	☐	☐	☐	☐	☐
6	Offline Capability: Provision for viewing downloaded modules without active internet.	☐	☐	☐	☐	☐

Part V – Open-Ended Questions (check if applied)

1. How would a digital pre-enrollment system save you time or resources compared to the current process?

☐ Reduces travel time and transportation costs

☐ Faster application and approval process

☐ Less paperwork and manual form filling

☐ Easier submission of requirements online

☐ Real-time status tracking of application

☐ Minimizes long queues and waiting time

☐ Accessible anytime and anywhere

☐ Others: _____

2. What specific competency per NC level do you think should be prioritized for e-

learning conversion?

- ☐ Basic automotive servicing (NC I)
- ☐ Engine maintenance and repair (NC II)
- ☐ Electrical system diagnosis (NC II)
- ☐ Advanced troubleshooting and diagnostics (NC III)
- ☐ Safety procedures and workshop practices
- ☐ Use of automotive tools and equipment
- ☐ Preventive maintenance procedures
- ☐ Others: _____

3. How can the system better assist instructors in identifying scholar who are struggling in core competencies/competency level?

- ☐ Performance analytics/dashboard for student progress
- ☐ Automated alerts for low scores or incomplete tasks
- ☐ Monitoring of quiz and assessment results
- ☐ Attendance and participation tracking
- ☐ Individual learner progress reports

☐ Early warning system for at-risk scholars

☐ Instructor feedback and evaluation tools

☐ Others: _____

4. In what ways can the system promote transparency in the scholarship selection process?

☐ Clear display of selection criteria and requirements

☐ Real-time updates on application status

☐ Public posting of qualified applicants

☐ Automated ranking and scoring system

☐ Notification of results via email/SMS

☐ Access to application history and records

☐ Audit trail for all transactions

☐ Others: _____

5. What features would make the e-learning modules more engaging for you as a Scholar?

☐ Interactive videos and tutorials

☐ Gamification (badges, points, achievements)

☐ Quizzes and instant feedback

☐ Virtual simulations for hands-on practice

☐ Mobile-friendly and responsive design

☐ Discussion forums or chat with instructors

☐ Real-life case studies and examples

☐ Progress tracking and achievements dashboard

☐ Others: _____

Part VI: Functional Requirements of the Proposed System

Please rate the relevance of the following features for Integrated Enrollment and Competency-Based E-Access Management System.

Scale:

4 – Highly Relevant

3 – Relevant

2 – Less Relevant

1 – Not Relevant

Functional Feature	5	4	3	2	1
Registration & Login: Secure account creation for applicants, scholar, and staff.	☐	☐	☐	☐	☐
Document Management: Ability to upload, view, and verify digital certificates.	☐	☐	☐	☐	☐
Eligibility Checker: A backend logic that flags if an applicant meets Isuzu-TESDA criteria.	☐	☐	☐	☐	☐
Learning Path Management: “Lock and Key” mechanism to ensure sequential mastery of modules.	☐	☐	☐	☐	☐
Grade/Competency Entry: Interface for instructors to mark scholar as “Competent”.	☐	☐	☐	☐	☐
Assessment Engine: Automated checking for theoretical modular quizzes.	☐	☐	☐	☐	☐
Progress Reporting: Generation of “Achievement Charts” for student portfolios.	☐	☐	☐	☐	☐
Announcement Board: Centralized area for regional memos and training schedules.	☐	☐	☐	☐	☐
Audit Trail: Logging of all administrative actions for transparency in vetting.	☐	☐	☐	☐	☐

Part VII: Technical Requirements of the System

Please indicate your level of agreement.

Scale:

5 – Strongly Agree

4 – Agree

3 – Neutral

2 – Disagree

1 – Strongly Disagree

Technical Requirements	5	4	3	2	1
------------------------	---	---	---	---	---

Cross-Browser Compatibility: The system must function on Chrome, Firefox, and Safari.	☐	☐	☐	☐	☐
Database Security: Encryption of sensitive applicant data and indigency files.	☐	☐	☐	☐	☐
Scalability: The infrastructure should support increasing numbers of applicants each year.	☐	☐	☐	☐	☐
Fast Response Time: Server processing for vetting results should happen within seconds.	☐	☐	☐	☐	☐
Session Management: Secure logout and timeout features to protect user accounts.	☐	☐	☐	☐	☐
Data Backup: Regular automated backups of student progress and scholarship records.	☐	☐	☐	☐	☐

Part VIII: System Improvement

1. Suggest features to improve the transition from online theoretical learning to face-to-face workshop tasks:

- ☐ Interactive video demonstrations for hands-on procedures
- ☐ Step-by-step guided modules before workshop sessions
- ☐ Downloadable learning materials for offline use
- ☐ Pre-workshop assessment quizzes
- ☐ Virtual simulation of auto mechanic tasks
- ☐ Integration of real-time instructor feedback
- ☐ Mobile-friendly learning interface
- ☐ Clear task instructions and visual guides

☐ Scheduling system for workshop sessions

☐ Others: _____

2. How can the system better handle low-bandwidth internet connections in Region VIII?

☐ Provide offline access/downloadable content

☐ Optimize system for low-data usage

☐ Use compressed videos and images

☐ Enable text-based or lightweight versions of modules

☐ Allow auto-save and resume features

☐ Reduce loading time and simplify interface design

☐ Provide SMS or notification-based updates

☐ Enable background syncing when connection is available

☐ Others: _____

3. Additional comments/suggestions for system development:

☐ Improve system speed and performance

☐ Enhance user interface and design

☐ Add more training modules and content

☐ Improve system security and data privacy

☐ Provide user training or tutorials

☐ Add multilingual support (e.g., Waray, Bisaya, Cebuano)

☐ Improve technical support and helpdesk features

☐ Others: _____
